(1) Your current escrow balance is \$1,183.11. To project the next year's tax and insurance payment we added \$544.44 for payments not yet made and subtracted \$1,508.31 for disbursement not yet made. This brings your projected starting balance to \$219.24 (see breakdown on next page).

(LP) The lowest (LP) required escrow balance for the next 12 months is scheduled to be \$501.76 (cushion) which is 1/6 of the anticipated escrow account installment. Under Federal Law (RESPA) or applicable state law, a cushion in your escrow account is permitted (excluding MIP/PMI).

(*) Your lowest (*) projected escrow balance for the next 12 months is scheduled to be \$219.20. Your bankruptcy escrow claim amount of \$0.00 will be added to your escrow balance. The difference between the lowest projected balance, bankruptcy escrow claim amount and cushion is \$282.56. This results in a shortage once all the payments not yet made for the tax and insurance portion are received. Your escrow shortage has been spread over a 12 month period.

(2) Based on the escrow account projection for the coming year indicated above, your escrow account requires a starting escrow balance of \$501.80 to arrive at the lowest (LP) required escrow balance.

This escrow analysis is based on the assumption that all escrow advances made on your loan prior to your bankruptcy filing date are included in your bankruptcy plan and will be paid through that plan. In other words, we are only analyzing for taxes (and insurance if applicable) that will come due after your current bankruptcy filing date.
